

NW Region CTCO Traffic Control Plan Requirements – Check-off Sheet

The following items will assist in providing a faster review. Traffic Control Plans need to be site specific.

1. ____ Name of project.
2. ____ Name of requester and entity (person and company/division, etc).
3. ____ What type of work? (Such as, subdivision, water line crossing, etc).
4. ____ TCP clearly shows the actual lane configuration (and sidewalks when applicable) and lane and shoulder widths if available.
5. ____ Work Zone locations accurately sketched on TCP, dimensions included. Show sequential arrow signs, TMA or protective vehicle, flaggers, sign locations, etc. in the TCP plans as applicable.
6. ____ Vicinity map with north arrow included.
7. ____ North arrow and scale (or not to scale) on the TCP. Include a legend referencing symbols used on TCP
8. ____ Provide all applicable taper lengths, sign spacing, channelization device spacing and buffer data.
9. ____ Indicate locations of driveways and signalized and non-signalized intersections.
10. ____ Indicate proposed work hours and days and whether work will occur daily or around the clock.
11. ____ List the name, telephone number and e-mail address of the person who prepared the TCP.
12. ____ Indicate posted speed limit and milepost range the work falls within.
13. ____ Open space on the TCP for 'Approval' stamp (2" X 2"+-).
14. ____ Indicate if phasing or staging is required.
15. ____ Show all streets within sign limits shown and named.
16. ____ Address pedestrian, bicycle and ADA traffic through Work Zone.
17. ____ Address protection of drop-offs and abrupt edges per Standard Specifications.
18. ____ Show any removal of permanent striping or permanent traffic control features.
19. ____ List the name, 24 hour telephone number, and the e-mail address of the Owner's or Contractor's Traffic Control Supervisor.
